PROFESSIONAL SUMMARY

Senior Software Developer with 4+ years of full-stack experience building scalable web and mobile applications using React.js, Node.js, and TypeScript. Proven background in delivering production-grade RESTful APIs, reusable component libraries, and CI/CD pipelines that reduce response times by up to 20% and defect rates by 30%. Strong contributor in Agile environments, with hands-on experience across the full SDLC from architecture through automated testing and cloud deployment. Currently based in Melbourne and seeking a senior engineering role where clean code, reliable delivery, and modern frontend craftsmanship make a measurable impact.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3, SCSS

Frontend: React.js, React Native, Redux, React Hooks, Material UI, Ant Design, Bootstrap, Three.js, Vite, i18Next, eCharts, react-pdf

Backend: Node.js, RESTful APIs, Socket.io, Bull, JWT Authentication

Testing & Quality: Jest, Cypress, React Testing Library, Storybook, ESLint

Databases: MongoDB, Firebase, InfluxDB

DevOps & Cloud: Docker, Jenkins, CI/CD Pipelines, GitHub, GitLab, Microsoft Azure, Google Cloud Platform, Linux

Tools & Methodology: Figma, Postman, Agile / Scrum, SDLC, Stripe API, Razorpay, VideoSDK

PROFESSIONAL EXPERIENCE

Senior Software Developer — Ocean Technolab, Melbourne, VIC *May 2022 – Present*

- Develop and maintain full-stack web applications using React.js, Node.js, and TypeScript, delivering production features end-to-end across multiple client projects.
- Designed and maintain Jenkins-based CI/CD pipelines, automating builds, testing, and deployments to streamline release cycles and reduce manual deployment overhead.
- Build and integrate RESTful APIs and reusable React components, ensuring consistent performance, maintainability, and reliability across production releases.
- Collaborate with product owners, designers, and QA in an Agile environment to translate business requirements into well-architected, maintainable technical solutions.

Senior Software Developer — WebOsmotic Pvt. Ltd., Remote, India *January 2022 – April 2025*

- Engineered RESTful APIs in JavaScript and Node.js for production web applications, improving backend performance and reducing average response times by 20%.
- Built reusable React.js component libraries documented in Storybook, leveraging Redux and React Hooks for predictable, maintainable state management.
- Implemented end-to-end and unit testing pipelines using Cypress and Jest, reducing production defect rates by 30% and increasing release confidence.
- Established CI/CD pipelines using Jenkins to automate build, test, and deployment workflows, accelerating release cadence and improving reliability.
- Operated within an Agile / Scrum team, applying SDLC principles to deliver robust, high-quality software within sprint commitments.

Junior Software Developer — iGeek, India

April 2021 – November 2021

- Developed an Invoice Management System using React.js and Node.js, including CRUD operations, pagination, and Stripe-integrated subscription billing.
- Designed dynamic frontend components in React.js from Figma UI/UX specifications, improving end-user experience and visual consistency.
- Modelled and managed 100+ MongoDB collections, reducing manual data entry effort by 50% through automation and improved data structures.
- Deployed backend services on Google Cloud Platform using Docker and Jenkins, improving deployment efficiency and environment compatibility by 30%.
- Established a streamlined CI/CD pipeline with GitLab and Jenkins while collaborating in an Agile delivery team.

Web Developer Intern — The Sparks Foundation, India

April 2021 – May 2021

- Built a Point-of-Sale mobile application using React Native, MongoDB, and InfluxDB, covering product, customer, and invoicing modules.
- Implemented JWT-based authentication to secure user access and protect sensitive transaction data.
- Integrated Stripe APIs to enable seamless card-based payment processing within the app.
- Wrote unit tests using Jest, improving project stability by 10% and supporting on-time Scrum delivery.

KEY PROJECTS

Coables — Online Therapy Platform

- Built the booking flow, therapist filtering, and dashboard UI in React, TypeScript, and Material UI, lifting overall task completion rates by 40%.
- Integrated VideoSDK for secure real-time video consultations and Razorpay for online payment processing.
- Visualised distributed analytics data using eCharts, achieving 97% accuracy across the dataset.

Online POS System

- Developed product management, subscription, and invoicing modules using React, Node.js, and MongoDB.
- Integrated Stripe APIs to support one-off and recurring payments, processing 500+ transactions and generating monthly summary reports via Bull job queues.
- Implemented JWT authentication and a role-based merchant dashboard, reducing manual billing time by 50%.
- Added i18Next for multi-language support and Socket.io for real-time client communication.

React Storybook Design System

- Created 20+ reusable UI components in React, SCSS, and TypeScript, fully documented in Storybook for cross-team reuse.
- Achieved 100% unit and snapshot test coverage using Jest and React Testing Library, ensuring stability across all use cases.
- Enforced strict TypeScript, ESLint, and accessibility standards (ARIA, WCAG, keyboard navigation), improving code consistency and accelerating developer onboarding.

EDUCATION

Bachelor of Engineering, Computer Engineering

August 2018 – May 2022

Gujarat Technological University, India | GPA: 9.27 / 10
